Reboot

LOCAL NETWORK

This section allows you to configure the local network settings of your router. Please note that this section is optional and you should not need to change any of the settings here to get your network up and running.

ROUTER SETTINGS

Use this section to configure the local network settings of your router. The IP Address that is configured here is the IP Address that you use to access the Web-based management interface. If you change the IP Address here, you may need to adjust your PC's network settings to access the network again.

Router IP Address : 192.168.1.1

Subnet Mask : 255.255.255.0

DHCP SETTINGS

☐ Disable DHCP Server Choose this option. The IP address must be manually assigned on each device connected to device.

☒ Enable DHCP Server Choose this option to setup as a DHCP server to distribute IP addresses to the LAN network.

DHCP IP Address Range : 192.168.1.3 to 192.168.1.254

DHCP Lease Time : 1 Day

Add/Apply

DHCP TABLE

Host Name	IP Address	MAC Address	Status
	192.168.1.11		Static
	192.168.1.8	00:0E:59:1A:C1:FA	Static
	192.168.1.9	8C:71:F8:86:7A:09	Auto
SamsungN220	192.168.1.7	B4:82:FE:B3:B0:0F	Auto
HP80D118	192.168.1.4	68:B5:99:80:D1:18	Auto

Helpful Hints..

These are the IP settings of the LAN interface for the Device. These settings may be referred to as Private settings. You may change the LAN IP address if needed.

The LAN IP address is private to your internal network and cannot be seen on the Internet.

If you already have a DHCP server on your network or are using static IP addresses on all the devices on your network, click on Disable DHCP Server to disable this feature.
